

Work Location:

Traveling

Job Purpose:

The Railroad Equipment Operator will perform a variety of skilled or semi-skilled tasks involving the operation, servicing, and maintenance of heavy equipment in railroad construction operation.

Job Type:

Full-time

Job Title:

Railroad Equipment Operator

Company Description:

Bottom Line Company, a railroad contractor, is a track and bridge maintenance provider, delivering a full range of services to domestic and international railroad customers. Our customers enjoy our full-service production of everything track. From track construction, maintenance, thermite welding, and surfacing, to crossings, on-site safety, and flagging, we ensure customers can count on us to meet all their track needs. Turning vision into reality, our talented and innovative team members work together to address the challenges of the rail industry, ensuring success and safety for the future. Each and every member of our team is essential to our success. For more information, visit www.bottomlinetrackservices.com and follow Bottom Line Company on LinkedIn.
